industrial & commercial

Interface Signage provide engraving and signage solutions for all types of applications, both standard and bespoke, incorporating logos, cut-outs and profiles.

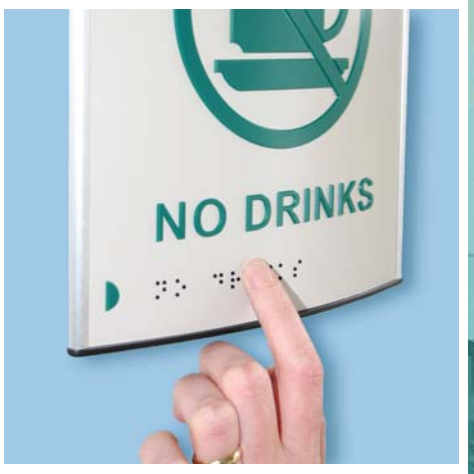

We produce some of the finest products in the engraving industry. Our engraved parts are used by customers throughout the world in a diverse range of industrial and commercial applications. Interface Signage supply the electrical and electronics industries and commercial outlets including hotels, restaurants, offices, retail, hospitals and leisure environments.

processes

Our capability in a wide range of engraving and post operational processes allows us to provide truly individual solutions. With the best raw materials available we will create a fully customised product using:

- laser & CNC engraving, holes & profiles
- sawing & bevelling
- raised (tactile) lettering & profiles
- Braille character insertion
- reverse engraved & paint filled characters
- engraving on customer's "free-issue" components: e.g.(electrical switches etc.)

technical

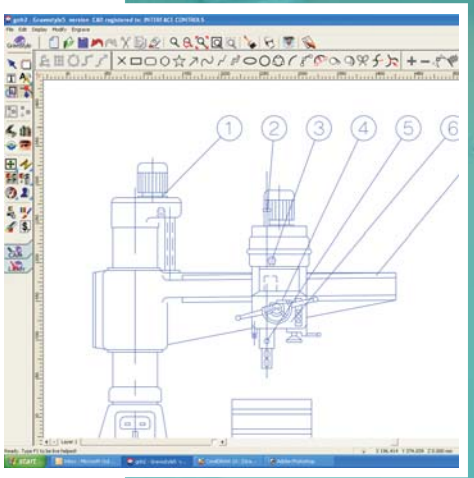

The final design can be produced from simple hand sketches or from data in these formats:

- AutoCAD .dwg or .dxf
- CorelDRAW .cdr or .eps
- Adobe Illustrator .ai or .eps

Our machines can engrave sizes up to:

- CO_2 Laser (LS800) - 610mm x 305mm
- CNC Rotary (IS8000) - 610mm x 1220mm**
- CNC Rotary (IS6000) - 610mm x 410mm
- CNC Rotary (IS400) - 305mm x 210mm

** Multiple passes, allows us to produce product in excess of 1220mm

products

Our range of products is almost endless. Applications include:

- badges, labels & nameplates
- facia plates
- hotel key fobs
- instrument panels & mimics
- plaques
- rating plates & serial numbering
- switch identification
- switch legend plates
- tags
- self-adhesive vinyl labels
- graphics

tactile & Braille signage

These signs are made with raised features and highly contrasting colours, allowing people with impaired vision to recognise the content by touch. They also include Braille characters and locators.

Our range meets the standards set out by the *Health & Safety Executive* and the *Discrimination Against Disability Act.*

Please contact us for a list of our standard range or to enquire about our bespoke designs.

materials

Interface Signage stock a broad range of materials including:

- hard laminates
- plastic laminates
- laminates available in many colour-combinations
- reverse engraving materials
- stainless steel, aluminium & brass
- special finishes

We realise that the choice of materials and finishes is almost endless. We are however pleased to assist you to produce the perfect solution for your environmental conditions.

self-adhesive labels & signage

Interface Signage manufacture custom self-adhesive vinyl labels. We use a 4 colour printing process utilising the best materials currently on the market today. There are no setting up charges involved and labels can be die-cut to any shape or size. Our process lends itself to small and medium runs. We cater for electrical, mechanical and decorative label designs.

We also manufacture custom designed internal signage from a vast range of materials and finishes, please call to discuss your requirements.

display area

Our offices are open between 07:30 – 16:30 Monday to Thursday and 07:30 – 13:30 Friday. You are welcome to come and view a full range of engraving techniques, samples, materials and finishes on show in our display area.

We are confident that actually seeing the wide range of engraving solutions we have on offer, will help inspire you.

We are happy to produce a sample for you please fax or e-mail your requirements to us.
